```
BankAccount.java
38 }
39
40 public static void main(String[] args){
41     BankAccount account = new BankAccount();
42
43     Thread depositThread1 = new Thread() -> account
44     .deposit(1000));
45     Thread depositThread2 = new Thread() -> account
46     .deposit(300));
47     Thread withdrawalThread1 = new Thread() ->
48     account.withdraw(150));
49     Thread withdrawalThread2 = new Thread() ->
50     account.withdraw(1200));
51
52     depositThread1.start();
53     depositThread2.start();
54     withdrawalThread1.start();
}
```

Output

```
Deposito: 1000.0
Saldo despues del deposito: 1000.0
Deposito: 300.0
Saldo despues del deposito: 1300.0
Retiro: 150.0
Saldo despues del retiro:1150.0
Intento de retiro:1200.0
Saldo insuficiente, retiro cancelado.
